

HYTRANS HOSEBOX

The HoseBox is a basic skid container frame to carry hoses including coupling. For example: 1000m of 6" (150 mm) hoses. It is designed to withstand hook arm handling and can be transported directly on a suitable hook arm truck as well as on our DuoContainer or CombiContainer.

Features

The HoseBox has side walls from stainless steel and a floor made of aluminium chequer plating. On both sides of the container there are lift-eyes for hook arm lift-off system and also functioning as crane-helicopter lift-eyes. Always included with our patented HoseBlocs to prevent hoses from shifting during container handling.

Dimensions

- Length: 4200 mm
- Width: 1060 mm
- Height: 1790 mm
