

FILTERING ESCAPE DEVICE PARAT® 3100

Dräger PARAT® 3100: Reliable protection in emergency situations

The Dräger PARAT® 3100 is a half-mask escape device designed to ensure worker safety in industrial environments. Approved according to DIN 58647-7, this device offers proven protection for at least 15 minutes against a wide range of toxic industrial gases.

Key features:

- **ABEK15 multi-gas filter:** The built-in filter protects against harmful chemicals, including toxic gases, vapours and particulates.
- **Half mask with 2-point harness:** The half mask is easy to don, allowing effective communication even in emergency situations.
- **Versatile carrying options:** The Dräger PARAT 3100 is equipped with a belt clip and offers four other carrying options: crocodile clip, carabiner, shoulder strap and lanyard.
- **Rugged, ergonomic housing:** The ergonomic design with non-slip surfaces makes handling the device easy, while the durable housing protects in harsh operating environments.
- **Low cost of ownership:** With a total service life of 12 years (filter replacement every 4 years), operating costs are minimal.

The Dräger PARAT 3100 is the ideal choice for ensuring personal safety during emergency evacuations.
