

HYDROSUB 60

A very innovative hydraulic driven portable submersible floating pump. Allowing quick access to any open water source at any distance up to 30 meter (horizontal or vertical) without draft loss. Powered by a diesel hydraulic Powerpack.

Capacity

- Standard: 1500 ltr/min at 10 bar
- Hi-Flow: 4000 ltr/min at 2,5 bar (optional)
- Floodpump: 20000 ltr/min at 0,3 bar (optional)

Control instruments

- Hytrans CAN-bus control system
- Vital parameters are monitored and automatically maintained (e.g. oil pressure, oil temperature, fuel level, motor temperature, etc.)
- Audible and visible alarms are generated when a parameter falls outside its setting. If ignored for a prolonged time, the unit either automatically regulates itself to a safe level OR at your choice "Run-to-death"
- Machine status light, surround illumination and working light
- Automatic water pressure regulation (option)
