

Dräger CPS 7900 Gas-Tight Suit

Tailor-made for use under extreme conditions: The gas-tight Dräger CPS 7900 provides excellent protection against industrial chemicals, biological agents, and other toxic substances. Its innovative material qualifies the CPS 7900 equally well for work in explosive areas and for handling cryogenic substances.

Anti-fog visor (optional)

- No fogging – without pretreatment
- Large viewing window offers a nearly natural field of view

RV PT 120 L regulation valve (optional)

- Connection to an external breathing air source
- Adjustable ventilation rate
- Available with automatic switch-over between SCBA and external air source upon request

Zipper on the side

- Choose between opening from the top or bottom
- Cover flap with press studs or hook-and-loop fastener
- Especially suited to the needs of emergency teams

Backpack

- Combinable with all known PA cylinder combinations and closed-circuit devices

Gas-tight safety gloves (attachable to the suit without tools)

- Different glove combinations in different sizes available

Integrated safety boots

- Easy to replace
- Attached to the suit
- Or gas-tight integrated socks

D-4598-2010

Benefits

Gas-tight suit

- SCBA worn inside the protective suit
 - five suit sizes (S-XXL)
 - side zipper
 - suit material D-mex, reusable
-

Protection in a class of its own

The chemical protective suit Dräger CPS 7900 was developed to protect its wearer when handling toxic or hazardous materials and to provide much needed support for a variety of dangerous tasks. The suit material D-mex™ offers unique resistance to various substances. The Dräger CPS 7900 meets and exceeds the requirements of international standards of fire departments, search and rescue organizations, and industry for reusable protection suits.

D-mex™: 5-Fold safety

The suit's innovative and unique material D-mex™ consists of five layers. An especially sturdy elastomer layer as well as a barrier layer resistant to chemicals is on the inside as well as the outside. This allows the suit to retain its full protective capacity even when the material on the outside becomes damaged. Its electrostatic properties make it possible to use the suit in explosive areas. The flexibility of D-mex™ even makes it possible to handle liquefied gases such as ammonia at a contact temperature of -80°C.

Outstanding wearing comfort

The chemical protective suit reduces the stress during the already difficult work in hazard zones and danger areas. With its new, ergonomic cut and five available sizes, the suit offers its wearers with a body height of 1.50 m to 2.10 m the highest degree of mobility during a wide variety of activities and tasks. Moreover, the clearly lighter weight and better drape of the suit material adjusts to the wearer's movements and offers the full range of flexibility.

Ready at any time

Innovative materials and new service concepts made it possible to significantly reduce time and expenses for regular testing and expenses. In addition, the suit can be easily cleaned and disinfected. This means the time and expense spent over the 15 years of service life of the suit is much less.

Never again gasping for a breath

Breathing air is a scarce commodity when it comes to runs involving toxic materials or hazardous atmospheres. The route to the deployment location and the decontamination location must be bridged. The actual tasks must be completed. This is followed by a careful decontamination so that suits can be removed. The amount of air

Benefits

available in a compressed air breathing apparatus often is insufficient to cover both activities. For this reason the suit can be equipped with optional pass thru's.

Intelligent details from head to toe

The design of the visor in combination with the full-face mask Dräger FPS 7000 offers an almost natural field of vision. Three different glove combinations can be attached to the suit quickly and without tools. Optionally, the suit can be equipped with integrated safety boots or gas-tight socks. An integrated radio pocket and a holder for push-to-talk buttons make communication easier.

Further accessories are available to customize the chemical protective suit to meet your specific needs and requirements, thereby expanding your range of application options. Including pressure gauge holder, height adjustment, anti-fog visor and D-Connect.

System Components

D-0915-2019

Dräger PSS® AirBoss

The Dräger PSS® AirBoss offers best in class ergonomics and is one of the lightest weight breathing apparatus for firefighting. Lessons learned from firefighters around the world as well as latest innovations in technology have led us to design an even safer and cleaner SCBA system that enables you to breathe more easily and for longer.

System Components

D-13077-2010

Dräger Comfort Vest

Increased performance by up to four hours – without the need for elaborate preparation or logistics: when work gets hot, the Dräger Comfort Vest CVP 5220 is always ready to use as it delivers the cooling action itself. This means: no pre-freezing, no dipping into water, no risk due to dangerous circulating air – and no time loss.

D-0427-2019

Dräger HPS® SafeGuard

The Dräger HPS® SafeGuard is the extremely lightweight universal helmet for fire and rescue services. Its innovative design combines optimal protection with the highest levels of wearing comfort. Its sporty look, light weight and tailor-made accessories make the helmet a real all-rounder for any challenge.

Accessories

ST-5692-2004

Nitrile-P boots

Firefighter's boots with toecaps, provide excellent protection against penetration, cutting and abrasion. Extra comfortable, in sizes 43 to 50.

Accessories

Gas-tight socks

Can be worn with the safety boots and, therefore, providing huge flexibility in choosing the right boot.

Cotton gloves

Optional glove for hygienic wear under chemical protection gloves.

Tricotril® over gloves

Cut resistance and chemical protection glove all in one, available in sizes 10 and 11.

K-MEX® Gigant over gloves

Additional cut resistance, available in size 14.

Accessories

Laminate + Tricotril combination

Combining mechanical and chemical protection in one – offering high sensitivity, in sizes 10 to 11.

Dräger Regulation Valve PT 120 L

Pass thru offering cooling effect on the body and additional breathing air from external sources.
